

# USI Master of Science in Occupational Therapy Curriculum

UNIVERSITY OF SOUTHERN INDIANA

The Master of Science in Occupational Therapy (MSOT) Program is designed for students who have a baccalaureate degree and are ready to apply for the entry-level graduate program in occupational therapy. The MSOT Program does not have a preference as to the major for the bachelor's degree as long as the required prerequisites courses are completed. The best undergraduate major is one in an area in which the student would enjoy working after obtaining the undergraduate degree and should be selected based on the student's interests.

## Prerequisite Courses:

		<b>28</b>
BIOL 121	Anatomy & Physiology I	4
BIOL 122	Anatomy & Physiology II	4
PSY 201	Introduction to Psychology	3
PSY 261	Lifespan Developmental Psychology	3
PSY 322	Abnormal Psychology	3
HP 115	Medical Terminology	2
HP 225	Pharmacology & Therapeutics	3
EXSC 383	Kinesiology	3
HP 302	Biostatistics	3

## Professional Coursework:

### First Year

<b>Fall Semester</b>		<b>17</b>
OT 611	Disease and Occupation	3
OT 623	Psychosocial & Cognitive Strategies	4
OT 624	Fundamentals of OT Practice	3
OT 631	OT Theory & Clinical Reasoning	4
OT 652	Applied Neuroscience	3
<b>Spring Semester</b>		<b>19</b>
OT 641	Occupational Therapy Research	3
OT 643	Occupational Considerations of Activities of Daily Living	4
OT 657	Specialized Evaluation Strategies	4
OT 663	Occupation Centered Practice	4
OT 671	Occupational Therapy Leadership	4
<b>Summer Semester</b>		<b>7</b>
OT 637	Occupational Interventions /Evidence Based Practice	4
OT 651	Professional Trends/ Emerging Practice	3

### Second Year

<b>Fall Semester</b>		<b>18</b>
OT 633	Physical Disabilities/Orthopedics in Occupational Therapy	4
OT 662	Professional Issues	4
OT 683	Advanced Occupational Therapy Research Strategies	3
OT 695	Prof Practicum Seminar A, B, C	3
OT 699	Occupational Therapy Synthesis	4
<b>Spring Semester</b>		<b>8</b>
OT 690	Special Topics	2
OT 696	Professional Fieldwork I	6
<b>Summer Semester</b>		<b>6</b>
OT 697	Professional Fieldwork II	6

**Total MS Hours: 75**

**See page 2 for a list of frequently asked questions about the MSOT Program.**

# OCCUPATIONAL THERAPY

**Q. How do I become an occupational therapist?**

A. First, you must complete an accredited educational program. Accredited programs are available in colleges, universities, and vocational, technical, or community colleges throughout the country. There are no on-the-job training programs in hospitals or other health-care facilities.

**Q. What kinds of educational programs are available?**

A. To become an occupational therapist (OT), you must complete a masters or doctorate program. Each type of program includes a minimum of six months of supervised clinical education or fieldwork. Because educational requirements vary from school to school, it is important to obtain specific information from each institution and program.

**Q. Can I transfer credits from another educational program toward a degree in occupational therapy?**

A. OT program requirements differ among institutions. If you have completed courses in another discipline, or are considering taking prerequisites at another educational institution, contact the individual occupational therapy program about their requirements. The USI OT Program Chair can review your transcripts and offer recommendations.

**Q. How do I find an occupational therapy educational program that fits me?**

A. Students can enter the OT Profession as a Certified Occupational Therapy Assistant (COTA) or as a Registered Occupational Therapist (OTR). Most COTA programs lead to an Associate's degree, but in the near future, COTA programs may lead to a bachelor's degree. All OT and OTA programs must meet standards developed by the Accreditation Council of Occupational Therapy Education (ACOTE) and all graduates must pass a national examination before obtaining a license to practice. USI is one of only a few institutions that offer both OT and OTA Programs.

**Q. What is the employment outlook for occupational therapists?**

A. The employment outlook for OTs is bright! Recent information published by the [US Department of Labor, Bureau of Labor Statistics](#) has projected the demand for OTs is expected to grow.

**Q. Where do occupational therapists work?**

A. One of the greatest advantages of a career in OT is the wide variety of opportunities available to graduates. OTs work with all age groups to promote health and wellness, and prevent disease &/or injury. OTs also work in schools with students who have learning disabilities or behavioral problems. Others work in pediatric hospitals with premature infants or with children born with cerebral palsy, Erb's palsy or Down syndrome. OTs work with individuals in their homes, at community centers, in rehabilitation hospitals, businesses, and skilled nursing facilities. In these settings, OT's help people with traumatic injuries, stroke, Alzheimer's disease, or mental health problems, learn to live productive lives through the use of meaningful occupations.

**Q. What is the average salary earned by an occupational therapist?**

A. Earning potential for occupational therapy personnel is very good, however salaries may vary somewhat with practice settings and geographic location. Check the [US Department of Labor](#) website for more information.
